THE COMPANY

For over 35 years, APRO Industrie has been designing, manufacturing, installing and maintaining bolted steel tanks, offering a comprehensive solution for the storage, processing or treatment of a wide range of liquids.

Today, APRO Industrie represents :

- A fleet of over 20,000 tanks in service
- Tanks with capacities ranging from 5 to 10,000 m³
- References worldwide
- Comprehensive expertise in liquid storage

Founded in 1987, APRO Industrie is France's pioneer in bolted steel tanks for liquid storage. Initially specializing in fire protection, APRO Industrie quickly became the national leader. Today, bolted steel fire water storage tanks have become the standard in fire protection.

Today, APRO Industrie has diversified to offer solutions for a wide range of applications. From drinking water to process water and urban or industrial effluents, we provide tanks designed to meet your specific needs.

OUR VALUES

Our values are at the core of our corporate culture. They form the foundation of our business vision and reflect our professional and human commitments:

- Customer satisfaction
- Responsiveness
- Thoroughness
- Social and environmental responsibility
- Professionalism
- Safety and security standards

FIELDS OF ACTIVITY / APPLICATIONS

FIRE PROTECTION

- Sprinkler tanks
- Tanks for fire-fighting systems
- Special risk tanks
- DECI fire water storage
- Tanks for DFCI

URBAN & INDUSTRIAL EFFLUENTS

- Buffer tanks
- Biological basins (SBR/MBBR/BRM/activated sludge)
- Clarifiers
- Sludge silos
- Leachate storage
- Retention of fire water

DRINKING AND PROCESS WATER

- Drinking water and food tanks
- Water towers
- Storm water tanks
- Raw water storage tanks
- Demineralized water tanks

OIL & GAS - ENERGY

- Digesters / methanizers
- Storage of demineralised and process water
- Hydrolysis tanks
- Digestate storage
- Biogas storage
- Boiler water storage

TANK COVERS

- Aluminum covers
- Galvanized steel covers
- Glass fused steel covers
- Epoxy-coated steel covers
- Stainless steel covers
- Fiberglass covers

MAINTENANCE & ACCESSORIES

- Tank renovation
- Leak repairs
- Tank inspection
- Roof replacement
- Tank cleaning
- Supply of equipment and accessories

TECHNOLOGY / ASSEMBLY

The tank is manufactured from metal panels prepared in the factory and assembled on site by bolting them together. The panels are available in galvanized steel, aluminum, stainless steel, epoxy-coated steel, or glass-fused steel.

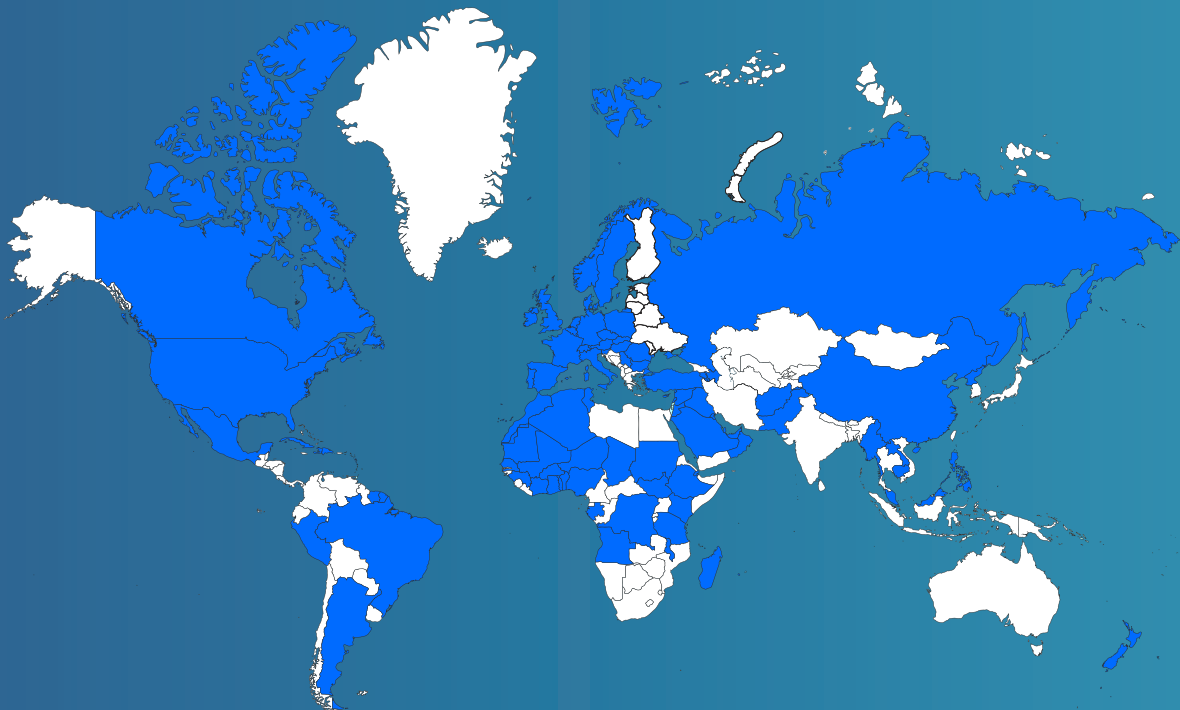

Two types of sealing systems are available: a mastic joint applied between the panels, or a liner custom-made to the tank dimensions.

Packaged on pallets and in crates, the tank is delivered to site in kit form, ready for assembly. The above-ground tank is anchored to a concrete slab, which provides the required structural support.

The tank is then erected by our specialist teams using hydraulic or mechanical jacks, or scaffolding.
