

COMPANY PRESENTATION

Since 1987

Specialists in Liquid Storage Solutions

APRO INDUSTRIE
www.aproindustrie.com

ABOUT US

Since 1987, APRO Industrie has been designing, manufacturing, installing and maintaining bolted steel tanks for the storage, processing and treatment of liquids.

Today, APRO Industrie represents:

- 20,000+ tanks in service worldwide
- Capacities from 5 to 10,000 m³
- Projects delivered across multiple continents
- Comprehensive expertise in liquid storage

Founded in 1987, APRO Industrie is France's pioneer in bolted steel tanks technology for liquid storage. Initially specializing in fire protection, APRO Industrie quickly became the national leader. Today, bolted steel fire water storage tanks have become the standard in fire protection.

Today, APRO Industrie provides storage solutions for drinking water, process water, wastewater, fire protection, and industrial applications, delivering tailor-made solutions to meet each project's specific requirements.

OUR VALUES

Our values are at the core of our corporate culture. They form the foundation of our business vision and reflect our professional and human commitments:

- Customer satisfaction
- Responsiveness
- Thoroughness
- Sustainability
- Professionalism
- Safety and security standards

FIELDS OF ACTIVITY / APPLICATIONS

FIRE PROTECTION

- Sprinkler tanks
- Fire-fighting water tanks
- Special risk tanks
- Wildfire water tanks
- Forest fire protection tanks

WASTEWATER & EFFLUENTS

- Buffer tanks
- Biological basins (SBR/MBBR/MBR/activated sludge)
- Clarifiers
- Sludge silos
- Leachate storage
- Fire water retention

DRINKING AND PROCESS WATER

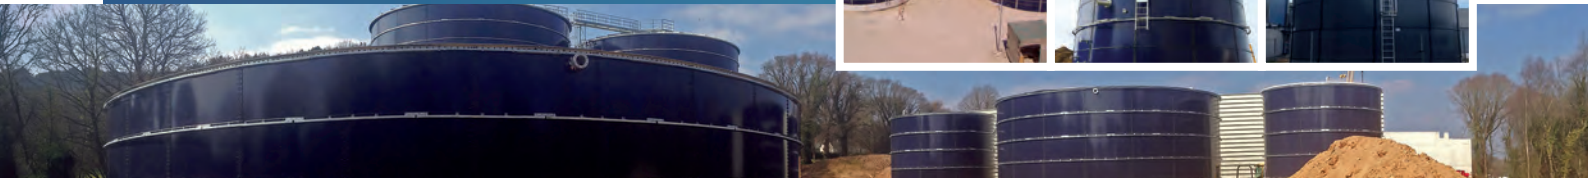

- Drinking water tanks
- Food-grade water tanks
- Water towers
- Storm water tanks
- Raw water storage tanks
- Demineralised water tanks

OIL & GAS - ENERGY

- Digesters
- Demineralised and process water storage
- Hydrolysis tanks
- Digestate storage
- Biogas storage
- Boiler water storage

TANK COVERS

- Aluminium covers
- Galvanised steel covers
- Glass fused to steel covers
- Epoxy-coated steel covers
- Stainless steel covers
- Fibreglass covers

MAINTENANCE & ACCESSORIES

- Tank renovation
- Leak repairs
- Tank inspection
- Roof replacement
- Tank cleaning
- Equipment & accessories

TECHNOLOGY & ASSEMBLY

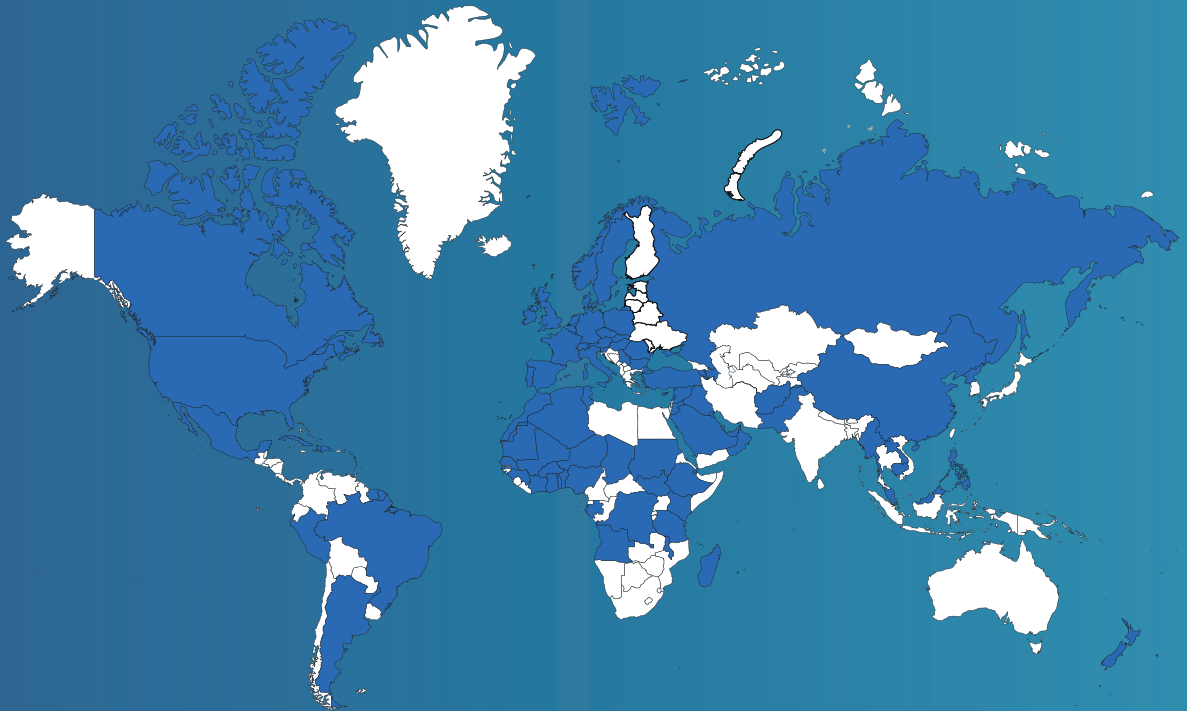

Our tanks are made from factory-produced steel panels and assembled on site by bolting them together.

The panels are available in galvanised steel, aluminium, stainless steel, epoxy-coated steel, or glass-fused-to-steel. Two sealing systems are available: a mastic sealant applied between the panels or a custom-made liner.

Delivered on pallets and in crates in kit form, each tank is assembled on site by our specialist teams using hydraulic or mechanical jacking systems or scaffolding. Once installed, the tank is anchored to a concrete foundation, ensuring long-term structural performance and reliability.
